

BUILD VS. BUY

STRATEGIC ANALYSIS

Executive Summary:
The Open Infrastructure Alliance wins
on every dimension. [cite: 3, 4]

Total Cost of Ownership: The ~70% Savings Reality [cite: 59]

The Proof Point: Jamaica at Scale, 1,000 schools, 6 vendors, 1 dashboard, zero prior WiFi experience. [cite: 30, 32, 34]

THE PROOF POINT: JAMAICA AT SCALE

LIVESDK: SOLVING THE #1 GROWTH INHIBITOR

 [cite: 38]

TOTAL COST OF OWNERSHIP: THE ~70% SAVINGS REALITY

"65-70% total savings when staffing is included—while delivering multi-vendor capability." [cite: 59]

VERIFIED PRICING BREAKDOWN (1,000 APs)

COMPONENT	UNIT COST	5-YEAR TOTAL
Edgecore Hardware (Entry)	\$70/AP	\$70,000
NetExperience Perpetual License	\$25/AP	\$25,000
NetExperience Annual Support	\$10/AP/yr	\$50,000
wibipOS Orchestration	\$12/AP/yr	\$60,000
PLATFORM SUBTOTAL		\$205,000
LiveSDK Partnership	\$120K/yr	\$600,000
TOTAL WITH LIVESDK		\$805,000

[cite: 53]

*Pricing verified from the Jamaica Ministry of Education deployment (MSTECH/WiBUZ). LiveSDK partnership is optional." [cite: 115, 53]

BUSTING INDUSTRY MYTHS: VENDOR LANDSCAPE & PRICE SENSITIVITY

THE “SIMPLICITY” & “MULTI-VENDOR” MYTHS

WHAT VENDORS CALL “SIMPLE”	WHAT’S ACTUALLY SIMPLE (OIA/wibipOS) [cite: 74]
One vendor, one dashboard, no choices	One dashboard, any vendor, full choices
Works until you need flexibility	Works regardless of circumstances
Hire expensive certified specialists	LiveSDK provides embedded expertise
Zero-touch for our hardware only	Zero-touch for *any* hardware
Customization = professional services fees [cite: 74]	Customization = included in partnership [cite: 74]

MULTI-VENDOR CLAIM VS. REALITY

Meraki/Aruba/Ruckus: “Yes, if all our gear”
wibipOS: “Yes, any vendor mix—1,000 sites, 6 vendors—PROVEN” [cite: 77]

31% of MSPs say their platform is “too complex to maintain.”
Legacy models create complexity.” [cite: 72, 73]

VENDOR LOCK-IN VS. OWNERSHIP: WHAT HAPPENS WHEN YOU STOP PAYING?

Frosted Glowing Glass

MSP REVENUE MODEL: YOU KEEP 100%

Frosted Glowing Glass

HANDLING OBJECTIONS: SURVEY-BACKED RESPONSES

OBJECTION: [cite: 88]
"OpenWiFi isn't enterprise-ready"

RESPONSE:
1,000 schools, 7,000 APs, 2,000 switches,
1,000 firewalls in production. 12.5% of
MSPs are already actively deploying it.
[cite: 89, 90]

OBJECTION: [cite: 91]
"We can't afford engineering talent"

RESPONSE:
37% cite lack of skilled personnel as #1
growth inhibitor. LiveSDK provides 25
R&D engineers for less than one senior
hire. [cite: 92, 93, 94]

OBJECTION: [cite: 95]
"Multi-vendor is too complex"

RESPONSE:
30% can't achieve unified management.
wibipOS delivers it—Jamaica proves it at
scale with zero prior experience.
[cite: 96, 97]

OBJECTION: [cite: 98]
"Our budget is limited"

RESPONSE:
34% say platforms are too expensive.
OIA delivers 85% cost reduction—within
reach for any budget.
[cite: 99, 100]

OBJECTION: [cite: 101]
"Meraki is the industry standard"

RESPONSE:
Only 12% are deploying Meraki. The
market votes for price: 48% TP-Link,
46% Ubiquiti.
[cite: 102, 103]

THE STRATEGIC QUESTION & CALL TO ACTION

The market is in transition. 56% want multi-vendor capability. 37% are held back by talent shortages. OIA + LiveSDK solves both with proven scale and 65-70% TCO savings. [cite: 105, 106, 107, 108]

The question isn't whether the market is ready. The question is: Which MSPs will move first—and which will keep paying the vendor lock-in tax? [cite: 109, 110]
